

Step-Traversing Backing Roll Cleaner

ContactClean™ Process Roll by Polymag Tek, Inc.

Polymag® Tek's Backing Roll Cleaner uses a traversing Contact Cleaning Roll to remove contaminants from the backing roll. After removing contaminants from the backing roll, the contact cleaning roll traverses to a home location, where it transfers the collected contaminates to an adhesive tape roll for permanent elimination.

Applications

- Backing Roll Cleaning

Features

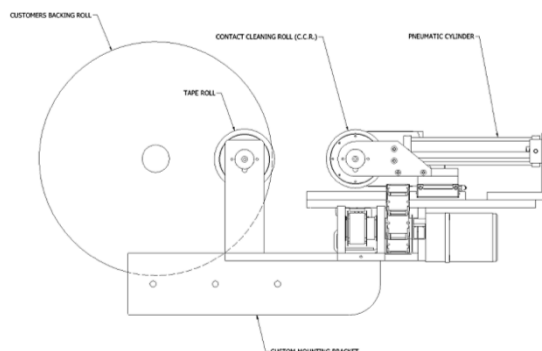

- On-line, dry cleaning process
- Programmable cleaning sequence
- Adjustable pneumatic touch cleaning force
- Easy tape roll and Contact Cleaning Roll change out

Process Parameters

- Roll widths up to 240"

Options

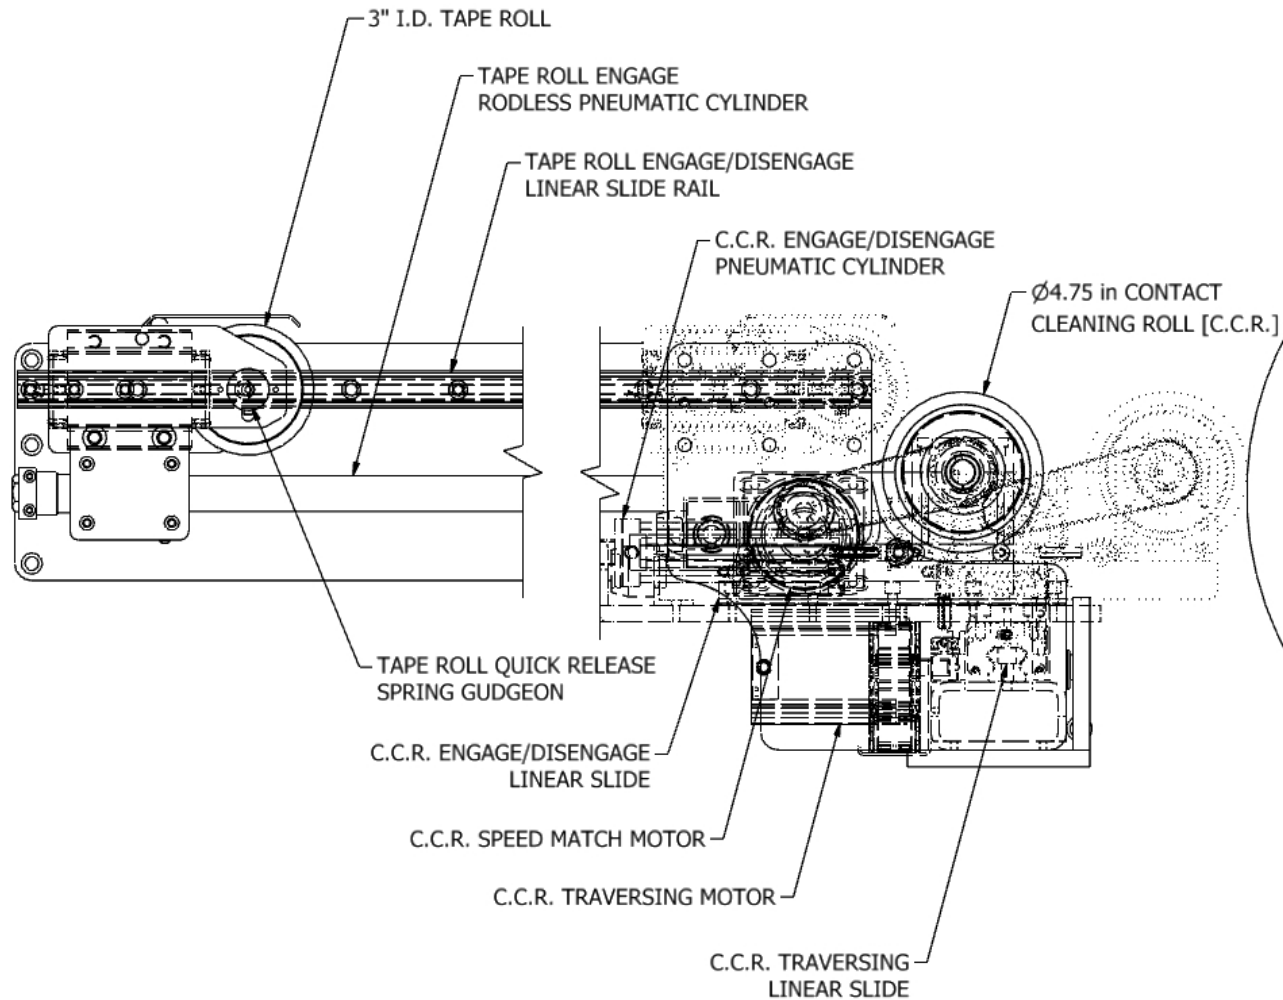

- Stepped cleaning or continuous traversing cleaning
- Contact Cleaning Roll speed match
- Custom mounting designs
- Static Elimination
