

POLYMAG®

Fits Cantilevered Style Flexo Press

Designed and manufactured in the U.S.A.

2RNWC-CT

NARROW WEB
CLEANER SYSTEM
FOR LABEL PRESSES
WITH CANTILEVERED
IDLE ROLLS

Narrow Web Cleaner System For Label Presses With Cantilevered Idle Rolls.

The Polymag® Narrow Web Cleaner System is designed to remove loose particulate contamination from a moving substrate. The Polymag® Blue Contact Cleaning Roll (CCR) contacts one side of the web as it transports through the web cleaner. Surface contamination is transferred from the web to the polymeric covered CCR. The CCR is continuously cleaned with an Adhesive Tape Roll. The contamination from the web collects on the surface of the Tape Roll. When the Tape roll become saturated, a layer of tape can be removed. Each tape roll contains 66 feet of adhesive tape. Approximately one foot of tape is used per tape change.

*All Our Web Cleaner Systems can be custom designed to fit any application. Little or no press modification required. Average installation time 5-15 minutes.
