NEVER BUY ADHESIVE ROLLS AGAIN!

Polymag™ Super Tack Roll

Use our Contact Cleaning Roll technique and save money instantly when it's time to replace your adhesive rolls. Instead of using costly consumable adhesive rolls, just drop in a Polymag™ Super Tack Roll. Polymag Tek Inc. has developed a unique permanent cleaning roll. The Super Tack Rolls can be used over and over just by washing the rolls with water and a lint free cloth! The Polymag™ Super Tack Roll utilizes our Contact

Cleaning Roll technology to remove contamination from your polymer rolls no matter what type you currently use! Our Super Tack Roll is covered with a proprietary polymer which picks off the contamination with its super tacky surface. Contamination is transferred from your existing polymer rolls to the surface of the Super Tack Roll.

Make the Super Tack Roll a quality and cost saving addition to your process!

FEATURES

- Simple, one-for-one replacement
- Payback in less than your next 12 adhesive roll replacements
